ABOUT US

Moving Surface is a visual effects company specialized in interactive solutions, 3D Projection Mapping and Visual Effects for every occasion – from social events to advertising.

We are a highly trained team of professional motion artist, animators and storytellers who will provide you with a complete solution, and take the project from concept through to delivery. Our designs are creatively lead and delivered in partnership with you, for the best results.

We offer our clients clever and creative solutions for 3D Projection Mappings, Stage Shows, advertisements, events or even permanent installations that will visualize your imagination.

Our Vision at Moving Surface is to create engaging solutions that leaves a lasting memory to our clients and her audience long after the initial launch of content.

INTERACTIVE MURAL WALL

Our Interactive Wall is specially selected and designed collection of tools to help you quickly and easily build high resolution, reliable and beautiful interactive walls. The technology in the kit has the capability to create a sound mural, multi-touch wall or add interactivity to projection mapping video installations.

Our design team at Moving Surface can design and build touch-sensitive wall for any exhibition, event or as a permanent installation so that visitors could learn about your business or product by interacting with an illustrated history of it.

When visitors touch the interaction points, motion graphics were projected onto the wall using projection mapping techniques to combine them with the painted illustrations.

Several people could interact with the wall simultaneously, providing an engaging way for them to learn during an exhibition.

INTERACTIVE FLOOR AND WALL

Our interactive wall and floor is a great way to physically engage audiences and customers during experiential marketing activations, or as permanent retail displays.

Users can participate in games and other interactive fun, or simply watch the digital magic unfold. And if you've got an out-of-the-box marketing idea or solution, chances are we can accommodate that too.

Perfect for high 'traffic' areas like shopping centres, airports, lounge and large public spaces, Interactive wall delivers incredible floor-to-ceiling entertainment that's sure to draw a crowd.

It not only reacts in real time, the floor and wall is a unique way that can create and send powerful messages by way of advertising, brand re-enforcement and establishing corporate identity.

Great for walkway in corporate functions or dance floor that is always affected by the dancer's movements or an interactive game that engrosses the users attention.

VIRTUAL ASSISTANT

Moving Surface Virtual assistant is an innovative way of delivering key messages at public places to passengers and visitors. Available 24/7, the virtual assistant ensures that you deliver the right message to the right people at the right time.

With a high footfall on every airport, shopping mall, exhibitions and conferences, there is always the challenge to communicate effectively and consistently with passengers, shoppers and visitors. To help find a way to relay useful information, Moving Surface introduced the Virtual Assistant. The next generation digital signage solution.

The Virtual Assistant is available for customization and use across a range of sectors as an innovative promotional and marketing resource, including retail, events and conferencing, rail travel, healthcare and the public sector.

Aided with motion sensor, the virtual assistant will start broadcasting your messages at the approach of passers-by with perfect sync of audio-video, full customization of the image and the message, ability to interact with the virtual assistant with the public through tablets.

E-PAINT WALL

The wall is a digital canvas where you can paint, a perfect interactive tool that can be utilized for an array of events, from weddings to corporate events, from showcases to specialty parties.

The technology allows guests to play with a “spray paint can” where all they have to do is paint on the screen as they would a wall outside. However, this time you will see paintings without the mess, as this is an eco friendly piece of technology that allows artists and non-artists to experience a new level of entertainment without having to worry about the clean up!

The wall features a large palette of colors to choose from, as well as customized stamps, stencils, and features for shading and highlighting which offer your photo the ultimate depth!

IMMERSIVE EXPERIENCE

An immersive experience is an illusory environment that completely surrounds you such that you feel that you are inside it and part of it.

Immersive Environment transform a surrounding using art, visual and media elements to create an intimate and powerful experience. With Immersive Environment we can change the atmosphere of a hall to suit the occasion, this include transiting the environment from the tranquil waterfalls of the Amazon to a busy city streetscape among many other scenes with the touch of a button.

Our Immersive setup is available for rentage or as a permanent installation for events and dinning.

PROJECTION TUNNEL

Projection tunnel creates a stunning entrance to your event. The tunnel surrounds your guest in moving video footage that can be created specifically for your event. Whatever your theme for your event the content of the projection tunnel can be made to reflect this. The Projection Tunnel can be turned in to an aquarium where the audience had an amazing view of the sea life, including some rather scary sharks!

The projection tunnel excellent for themed entrances for parties or awards ceremonies.

You're only limited by your imagination. Shark's, time tunnel, flames, sponsor branding are among custom content that can be viewed in the tunnel.

The tunnel works by using six projectors (three each side) and state of the art blending and morphing software to wrap the video seamlessly around the tunnel.

The tunnel will fit in a space of 10m(w) x 10m(d) x 2.5m(h) and its available for hire as a complete solution.

WATER SCREEN

Water screens can be used for a variety of media including Video, Lighting and Lasers. The water screen's unexpected and instant appearance in the middle of a body of water can both surprise and enchant an audience. Images appear to float in the air and are often described as 'holograms'.

We are pioneers in water screen technology in Nigeria and have systems available for events or permanent installations.

If you think that a water screen could be the right solution for your project please get in touch so we can advise you. Moving Surface will deliver a custom solution to suit your requirements; it could be fixed or floating, land based, in a lake, a pool or the sea.

The water screen creates a semi circular spray of water suitable for rear projection with lighting, projection and video. The Water Screen is created by pumps driving into a custom-made nozzle. Our water screen nozzle is different to other models on the market, giving greater wind stability. The size of the screen is dependent upon the pumps driving it and can reach sizes of 10m by 7m.

PROJECTION MAPPING

Projection Mapping is a relatively new technology that involves mapping projected content to unusually shaped surfaces.

The technology allows us to turn every day objects in to an impressive media display. Our software has advanced algorithms built in that allow us to easily warp an image in to any size or shape.

From a sports car to a high-rise building, we have the technical capabilities and experience to create a unique and engaging attraction that will leave people in awe as they wonder how a seemingly ordinary object appears to come alive before there very eyes.

LARGE VENUE PROJECTION RENTALS

From a small to a large venue projector, we have all the video equipment you need to make any event visually stunning to the audience.

At Moving Surface, we approach projector rental differently than our competitors.

Many AV companies offer “dry rent” which means they provide projectors to people who sometimes don’t know how to use them. Unfortunately, that also means their equipment is often poorly maintained or damaged.

We not only have a large inventory of the highest quality projectors for rent, but our technicians also ensure the history and condition of our equipment.

Our projectors inventory range from the affordable to the high-end. We use it in conferences and projection mapping projects. We also provide other professional video equipment such as switchers and video processing devices to support our projection systems.
